

InvisiPac[®] GM100

Plug-Free[™] Hot Melt Applicator

Get the benefits of plug-free dispensing in a compact design

- Easily fits into tight spaces
- Fast – operates at up to 10,000 cycles per minute to accurately place dots or stitch
- Long-lasting for more uptime – solenoid easily lasts up to 150 million cycles with no performance impact
- Innovative module filter design eliminates nozzle plugging

PROVEN QUALITY. LEADING TECHNOLOGY.

Hassle-free operation

Reduce downtime due to plugged nozzles

With the InvisiPac GM100, you'll experience a new era in hassle-free operation. With its innovative free-flow manifold design and its integrated module filtering – together with the InvisiPac System – you can eliminate nozzle plugs. You'll finally have a hot melt system that runs reliably, unnoticed and invisible.

Fast shot speeds

- High-speed – operates at up to 10,000 cycles per minute
- Response time is maintained to at least 150 million cycles (see chart) to help promote great adhesive bead hygiene
- Reliable, accurate startup performance – hits the first bead, every time

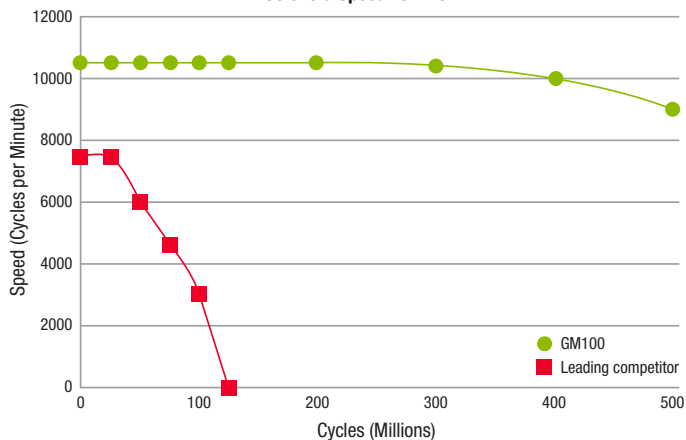

Long life, more uptime

- Solenoid lasts over five times longer than the leading competitor
- Quick 10-minute heat up time gets you up and running sooner
- Free-flow manifold design is engineered to eliminate dead zones where char will build up
- Manifold and module filters eliminate nozzle plugs to keep you running

GM100 solenoid versus leading competitor's solenoid

Solenoid Speed vs. Life

Compact design

- Easily fits into tight geometries
- Drop-in form factor for leading competitive models
