Ultimate Spraying Excellence

Apply Superior Quality Finishes

With one of the best spray patterns in the industry, the AirPro gun is a real stand-out! Delivering:

- Even material distribution through the spray pattern for optimum coverage
- Improved transfer efficiency through reduced air consumption
- Reduced spray turbulence due to uniform air flow
- Enhanced atomization is achieved through material specific aircaps

To test these key features, Graco uses multi-dimensional imaging to measure material spray density and material distribution.

- Red indicates dense particles
- Blue indicates dispersed particles

As in the shown picture, even blue throughout the pattern is desired at the spray target.

SUPERIOR QUALITY

Maximize Operator Comfort and Increase Productivity

Ergonomically designed for superior handling, the AirPro guns maximize productivity by minimizing operator fatigue and discomfort:

- Gun is lighter (410 grams) and better balanced, making it easier to spray at a steady rate all day
