Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.

Why Graco?

We are where you are

Sustainability

The World Summit on Social Development identified sustainable development goals, such as

Economic Development, Social Development, Environmental Protection.

Environmental Protection

Reducing greenhouse emissions is being tackled at all scales, including engineering of emerging technologies such as energy storage systems - compressed air energy storage.

Economic Development

Greening not only generates increases in wealth, in particular a gain in ecological commons or natural capital, but also produces a higher rate of GDP growth".

Social Development

The transition required to reduce global human consumption to within sustainable limits involves much larger changes. Make cities and human settlements inclusive, safe, resilient and sustainable.

Graco Sustainability

We only have one earth and we need to take good care of it for our children and grandchildren. That is why Graco is committed to making our products and operations more sustainable. Our researchers and environment specialists continuously work on new methods to run production and distribution processes in a more environmentally-friendly manner and to make these processes as sustainable as possible. In Graco factories and distribution centers, this is demonstrated mainly behind the scenes by increasing recycling and reducing energy consumption. An ecological approach to products includes applications reducing the waste of raw materials and techniques for detecting and repairing leaks in systems that use highpressure air.

About Graco

Graco strives for continuous improvement and excellence. To guarantee superior quality and to meet the market's changing requirements, we prioritize the investment of human and financial resources in Research and Development. Every day, over 440 engineers perform research, product and process development. Innovative technologies and extensive field testing are a natural part of our process to develop new products. Every aspect of our production is subject to constant testing and evaluation. It's the foundation to deliver products with long service life and low cost of ownership. The insurance to help you grow your business.
